

TOWARDS USER-CENTRIC TRANSPORT IN EUROPE

Challenges, solutions and collaborations

BRUSSELS
22-23 MAY
2017

**VENUE TO BE
CONFIRMED**

Global socio-economic and environmental megatrends are posing new challenges and making new demands on transport in Europe. This paradigm shift in mobility and transport calls for disruptive technologies and multimodal solutions.

Mobility4EU is establishing a roadmap for the transport system in Europe in 2030 by identifying and assessing societal challenges that will influence future transport and demand. To put this plan in action, Mobility4EU is setting up an interactive stakeholder forum.

MIND-SETS, on the other hand, offers guidelines and tools that will give policy makers and decision takers a valuable new outlook on 21st century mobility.

Keynote speakers will provide the impetus for a discussion with a selection of ongoing **European projects** that are looking into future transport and mobility needs and solutions in Europe. Together with the conference participants, they will create a new prism through which to understand European transport.

Tomorrow's transport issues will require innovative solutions, and innovative solutions require imaginative questions.

SAVE THE DATE

DON'T MISS THE CHANCE TO BRAINSTORM IMAGINATIVE QUESTIONS AND TO SEE THE NEW MOBILITY, ALONG WITH ITS COMPLEX AND MULTIFACETED CHALLENGES, WITH DIFFERENT EYES.
