MOBILITY4EU FINAL PUBLIC EVENT

TOWARDS USER-CENTRIC TRANSPORT IN EUROPE

BRUSSELS
13 NOVEMBER 2018

BLUE POINT
80 BD A. REYERS

Global socio-economic and environmental megatrends are posing new challenges and demands on transport in Europe. This paradigm shift in mobility and transport calls for disruptive technologies and multimodal solutions.

Started in 2016, Mobility4EU (H2020 CSA) established a **Vision** and an **Action Plan** for the future of transport in Europe in 2030, based on the identification and assessment of societal challenges that will influence future transport demand. In 2017 the **European Transport and Mobility Forum** has been launched to put in action user-centric approaches, cross-modal cooperation and projects joining transport of passenger and freight.

You will be introduced to the Vision and Action Plan for user-centric and cross-modal transport in Europe in 2030.

You will be involved in interactive workshops to gather the feedback for the Action Plan.

You will contribute to the topics of the European Transport and Mobility Forum, that will work on beyond Mobility4EU.

You will explore pathways towards user-centric transport and building of an integrated transport system.

SAVE THE DATE

Don't miss the chance to brainstorm imaginative questions and explore novel approaches, along with complex and multifaceted challenges.
